EXAMINER'S AMENDMENT

amdt B / prop

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: in claim 19, on line 1, after "The" inserted --method for manufacturing a--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

A light-wave circuit module or a method of making, comprising:

- a substrate having a spot of substantially circular concave shaped;
- an optically reflective film formed along an inner surface of the spot;
and
- a planar optical waveguide passing through said spot;
wherein light of said optical waveguide is reflected and focused
obliquely upward by the optically reflective film in said spot.

The underline limitations are critically, since it improves to provide a light-wave circuit module in which laser light that has passed through

an optical waveguide can be coupled with high efficiency into a photodetector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
